## DETAILED ACTION

### *Allowable Subject Matter*

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a personal video recorder coupled to a display device to selectively present broadcast programs and recorded content to a viewer, which maintains a viewing menu. Independent claim 1 identifies the uniquely distinct features, "the viewing menu comprises for **predetermined day of a week at least** channel and time information of broadcast programs the viewer has previously selected on the **predetermined day of a previous week**" and "**displaying the viewing menu on the predetermined day of the week to enable the viewer to select between executing and not executing the viewing menu.**"

The closest prior art, Ellis et al. (US Pub. No. 2002/0054068) discloses a personal video recorder coupled to a display device, which maintains a viewing menu, wherein the viewing menu comprises channel and time information that can be displayed and updated upon viewer input. In the same field of endeavor, Florence (US Pub. No. 2002/0188948) teaches a personal video recorder that allows for a plurality of different viewing menus for the viewer and has the ability to track a viewer's actual selections of broadcast programs and storing the selecting in a log file.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. US Pat. No. 6,351,596
- b. US Pub. No. 2003/0005431
